

Tower Corporation Kernville Camp Kernville

May 8, 2023

Dear Tenant,

Southern California Edison has informed us there will be additional upcoming outages as they continue the work on the electrical system in town.

We are aware the text alert system has encountered a technical issue and did not deliver the latest outage notification and reminder as was scheduled. We will be working with a new provider in the future. Once the text alert system is reestablished, we will be sure to send out a 'welcome' text message letting you know the change has been made.

In the meantime, notifications provided to us by Edison will be posted to your units as well as a new board located by the stop sign at the front entrance (to be installed no later than May 15th, 2023).

Edison often schedules maintenance outages 7-10 days out and all information is continuously updated on their webpage. Please be sure to visit the web address below, select the radial button next to 'address', enter 24 Sirretta into the box and click search results to stay up-to-date on the continued maintenance in Kernville.
