REBATES TO OFFSET MOST OR ALL COSTS TO INSTALL A RESIDENTIAL BATTERY STORAGE SYSTEM

TOWER CORP
55 Lake Havasu Ave. S.
Lake Havasu City, AZ 86403-0938

P22T1039

Available in high fire risk areas impacted by Public Safety Power Shutoffs, you may qualify to prepare your home with backup power.

Dear Valued Customer,

At Southern California Edison (SCE), safety remains our number one priority. When the risk of wildfire is high, it may be necessary for us to declare a Public Safety Power Shutoff (PSPS) and temporarily turn off power in your neighborhood to help ensure public safety.

While taking every effort to reduce the number and length of outages, we are committed to increasing customer resiliency. With our Self-Generation Incentive Program (SGIP), you may be qualified to have an energy storage system installed at your home for little to no cost. These systems are designed to offset your energy use and help provide backup power for your home in the event of an outage or PSPS.

Prepare your home with backup power.

You may be eligible if you live in a Tier 2 or Tier 3 high fire risk zone; or your electricity was shut off during two or more discrete PSPS events; **and one** of the following:

- You are eligible for the Equity Budget*;
- You are eligible for the Medical Baseline program**;
- You have notified us of a serious illness or condition that could become life-threatening if electricity is disconnected; or
- Your primary residence relies on an electric pump for well water supply and your household income is not greater than 80% of Area Median Income (AMI).

Get more details about qualification and helpful support.

Visit sce.com/sgip to view a map of qualifying Tier 2 and 3 high risk fire zones and income qualified areas (*SGIP Equity Resiliency Map*) and to download our *SGIP Approved Vendor List* to select a contractor that can verify eligibility and support you through the process.

Additionally, your contractor may qualify for the "Financial Assistance Pilot" which will allow you to install the energy storage system with no money down. Your vendor can find additional information on this pilot by contacting SGIPGroup@sce.com.***

You don't need to have solar to qualify.

Although the power supply from your residential energy storage battery during an outage is significantly increased when paired with a home solar system, you don't need to have solar to qualify. Customers on a

continued on reverse

Time-of-Use (TOU) rate plan with an energy storage system may benefit from shifting some of their energy use to lower-priced TOU periods.

If you don't meet the eligibility requirements above, we still have options for you!

We have rebates from **\$50** up to **\$500** for other products that can help in the event of a power outage. Visit **Marketplace.sce.com** to compare and shop for qualifying Portable Power Stations or Portable Generators.

If you've already purchased a qualifying product and would like to apply for a rebate, locate your product at **Marketplace.sce.com** and click on the orange *Product Rebate* button in the upper right. A proof of purchase is required and products must meet the terms and conditions listed on the SCE Marketplace.

We have many other rebates available to you. Visit **sce.com/rebates** to learn more.

For additional information, please submit questions to **SGIPGroup@sce.com**.

Sincerely,

Katie Sloan

Director, Advanced Energy Solutions
Southern California Edison

* For the Equity Budget, residential projects must show proof of income qualification or PU Code Section 2852 Compliance. Additionally, the Equity Budget is available to residential customers who have participated in, or are eligible for the Multifamily Affordable Solar Housing (MASH), Solar on Multifamily Affordable Housing (SOMAH), Single-Family Affordable Solar Housing (SASH), or Disadvantaged Communities - Single-Family Affordable Solar Housing (DAC-SASH) programs.

** If you or someone in your household requires the regular use of electrically-powered medical equipment or other qualifying medical devices, you may be eligible for our Medical Baseline Allowance program. Learn more at **sce.com/residential/assistance/medical-baseline**.

***SGIP incentive payment process: The upfront payment of 50 percent of the approved incentive value will be provided to the approved vendor once the Reservation Request Forms (RRF) have been reviewed and a confirmed incentive reservation has been issued. The remaining 50 percent incentive will be paid to the vendor upon completion of the energy storage and once the Incentive Claim Forms (ICF) have been reviewed and approved.

All applications are subject to eligibility. Customers qualifying for the SGIP Equity Budget portion are required to validate income and/or deed-restricted low-income residential housing status.

Community Income and Housing Qualifying Definitions:

Low-Income Residential Housing:

- **Multifamily residential building** of at least five rental housing units that is operated to provide deed-restricted, low-income residential housing (described in clause (i) of subparagraph (A) of paragraph (3) of subdivision (a) of § 2852 of the Public Utilities Code) **and** is either:
 - 1) In a **Disadvantaged Community**; or
 - 2) A building where at least 80% of the households have incomes at or below 60% of the area median income, as defined in subdivision (f) of § 50052.5 of the Health and Safety Code. Any customer account in such buildings will be eligible for the SGIP Equity Budget.
- **Single-family homes** are also eligible regardless of location if they are a low-income residence, as described in subparagraph (C) of paragraph (3) of subdivision (a) of § 2852 of the Public Utilities Code. Per the SGIP Handbook, a presumed resale restriction may also be demonstrated to meet the resale restriction eligibility requirement, such as single-family homes located in IRS-defined Qualified Census Tracts and other designated areas eligible for the Single-Family Affordable Solar Homes (SASH) program.

Disadvantaged Community: Any census that ranks in statewide top 25% most affected census tracts in most recent version of CalEnviroScreen or census tracts that score within highest 5% of CalEnviroScreen's pollution burden, but do not receive an overall CalEnviroScreen score.
